## Stage Setup Notes:

I would like the long shots at 15-20 yards and the short shots no less than 7 yards. I would like all targets on the very back of the range.

May need to stagger the walls a bit on the trap side so they are not hit on through shots on angle based on width of the shooting lane between the walls.

Barrel in the middle should be set so you can see the 4 standing in front of the barrel but if not, only three of the four are visible from the shooting zone at the end of the wall if possible.

Be careful placing the end targets so the shooting angle hits the trap. May need to adjust.
